For example, the team batting first makes 120 runs off their full 80 balls, their run rate is 1.5. If the innings of the team batting second is reduced to 60 balls, their target score will be 91. This is based on innings run rate of 1.5 per over plus 1 run to win the match.

18.2. Totals are to include 5 runs per wicket taken.

19. Match Results for Cluster Groups

Win:	4 points
Tie:	2 points
Abandoned:	2 points
Cancelled:	1 point
Loss:	0 points

Clubs can choose to reschedule fixtures in the event of an abandoned or cancelled fixture. The home team can suggest two alternative dates, as long as they fall before the fixture deadline (Sunday 18th August). If the opposing team are still unavailable, they would concede the fixture, receiving 0 points and gifting 4 points to the home side.

In the event of teams finishing on equal points, the final standings shall be decided in the following order of priority. If two teams have equal points, the team that won the match between them will be placed in the higher position. If still equal, e.g., the game was abandoned/tied, the team with the higher net run rate across the Cluster Group League will be placed in the higher position.

**Net run rate is calculated by the average runs per over that a team scores minus the average runs per over that's scored against them.

20. Calculation for Teams Qualifying for the County Finals Day

All Group/Cluster winners will go into the calculation for qualification.

Three teams will qualify automatically for Finals Day based on this calculation.

Points Total (however, if number of games played is unequal, then highest average points score)

If points, or average points is equal, then teams will be determined by the overall highest run rate.

The 4th/5th placed group winners, based on the calculation, will then play a playoff for the 4th place in the County Final.
